Schedule

The 19D OSUT training schedule is the backbone of preparing soldiers for their crucial roles as cavalry scouts. This meticulously planned curriculum ensures that recruits receive comprehensive training, progressing from foundational military skills to specialized cavalry scout competencies. The structured approach of the 19D OSUT training schedule is designed to progressively build knowledge, skills, and physical readiness, ensuring that each soldier is adequately prepared for the demanding realities of their MOS (Military Occupational Specialty). Understanding the nuances of this schedule is vital for anyone considering or currently undergoing this rigorous training.

Unpacking the 19D OSUT Training Schedule: A Phased Approach

The 19D OSUT training schedule is a unified program that combines Basic Combat Training (BCT) and Advanced Individual Training (AIT) into a single, cohesive training pipeline. This consolidation is designed to streamline the training process and ensure that soldiers are not only proficient in basic soldiering skills but also highly skilled in their specific cavalry scout roles from the outset. The 19D OSUT training schedule is typically divided into distinct phases, each with its own set of objectives and training modules.

Phase 1: The Foundation of Basic Combat Training (BCT) within the 19D OSUT Schedule

The initial phase of the 19D OSUT training schedule mirrors the fundamental elements of BCT. This period is dedicated to instilling discipline, teamwork, and basic military knowledge. Soldiers learn the core principles of soldiering, including drill and ceremony, physical fitness, land navigation, basic first aid, and marksmanship with their assigned service rifle. The emphasis here is on transforming civilians into soldiers, establishing a solid military foundation upon which advanced skills will be built.

Drill and Ceremony Proficiency

A significant portion of BCT, and therefore the early 19D OSUT training schedule, is dedicated to mastering drill and ceremony. This aspect of training instills discipline, attention to detail, and unit cohesion. Soldiers learn to execute commands precisely and maintain formation, fostering a sense of order and unity essential for military operations.

Physical Fitness Standards

Physical readiness is a non-negotiable component of the 19D OSUT training schedule. Recruits undergo rigorous physical training designed to build strength, endurance, and agility. This includes running, obstacle courses, and strength-building exercises that prepare them for the physical demands of combat and their specific MOS.

Marksmanship and Weapons Familiarization

Learning to effectively use and maintain their standard-issue weaponry is a critical early skill. The 19D OSUT training schedule includes extensive instruction on marksmanship, weapon handling, and safety procedures. Soldiers are trained to achieve proficiency with the M4 carbine and other relevant weapons systems.

Phase 2: Advancing to Cavalry Scout Skills in the 19D OSUT Training Schedule

Following the successful completion of the BCT portion, the 19D OSUT training schedule transitions into the Advanced Individual Training (AIT) phase specifically tailored for the Cavalry Scout MOS. This is where the focus shifts to the specialized skills and knowledge required to perform reconnaissance, security operations, and intelligence gathering. The 19D OSUT training schedule in this phase becomes highly technical and operationally focused.

Mounted Operations and Vehicle Proficiency

Cavalry Scouts are renowned for their mobility, often operating in specialized vehicles like the Bradley Fighting Vehicle or the Stryker. The 19D OSUT training schedule provides extensive hands-on training in operating these vehicles, understanding their capabilities and limitations, and executing tactical maneuvers.

Intelligence Gathering and Reporting

The effectiveness of cavalry scouts heavily relies on their ability to gather, analyze, and report intelligence. The 19D OSUT training schedule educates soldiers on intelligence disciplines, including identifying enemy patterns, assessing threats, and creating accurate and timely reports for command decision-making.

Land Navigation and Tactical Movement

While basic land navigation is covered in BCT, the 19D OSUT training schedule expands upon this with advanced techniques relevant to scouting missions. Soldiers learn to navigate complex terrain under various conditions, plan tactical movements, and maintain situational awareness in dynamic environments.
