This could be a particular story you've heard about, a specific author named Kristen, a certain time period, or a theme that resonates with you. Having a focused starting point can make the vastness of the archive feel more manageable and guide your initial exploration. As you discover more, your interests may broaden organically.

How does this story relate to others in the archive? Consider the author's voice, style, and any potential biases. This critical engagement will lead to a deeper understanding and a more enriching experience.

Document Your Findings

If you are conducting research, it is essential to document your findings meticulously. Keep detailed notes on the stories you read, their source within the archive, relevant page numbers or document identifiers, and any quotes or insights you wish to record. This will be invaluable if you intend to cite these materials in any academic or written work.
