## **Key Concepts Addressed in Session 2**

LETRS Unit 1 Session 2 covers several fundamental concepts critical to literacy instruction. Understanding these concepts is vital for teachers aiming to implement research-based methods in their classrooms. The session emphasizes the connection between phonemic awareness and orthographic mapping as foundational to fluent reading and spelling.

### **Phonemic Awareness**

Phonemic awareness refers to the ability to identify and manipulate individual sounds (phonemes) in spoken words. This skill is a strong predictor of a child's reading success. The session explains how explicit instruction in phonemic awareness can enhance decoding abilities and support early reading development.

### **Orthographic Mapping**

Orthographic mapping is the process by which readers store written words in their long-term memory for instant retrieval. This process relies on strong phonemic awareness and knowledge of letter-sound correspondences. Session 2 clarifies how orthographic mapping enables fluent word recognition and spelling, reducing the cognitive load during reading.

### **The Reading Rope Model**

The reading rope illustrates the integration of multiple language strands, including word recognition and language comprehension, that combine to produce skilled reading. Session 2 highlights the importance of strengthening each strand and shows how phonemic awareness and orthographic mapping contribute to the word recognition strand.
