Unit 5 emphasizes the importance of phonological and phonemic awareness as foundational skills for reading acquisition. These auditory skills involve recognizing and manipulating sounds in spoken language, which is critical for decoding words.

Key Concepts Covered

This unit covers several vital concepts including the identification of syllables, onset and rime, and phoneme segmentation and blending. It explores how these skills support reading fluency and spelling development.

Typical Post Test Questions

Questions in the post test often require demonstration of knowledge on tasks such as:

- Distinguishing phonemes in spoken words
- Segmenting words into individual sounds
- Manipulating sounds to create new words
- Recognizing syllable types and patterns

Sample Post Test Answers

Correct answers generally reflect an understanding that phonemic awareness involves the smallest units of sound and that these skills are auditory, not visual. For example, segmenting the word "cat" into /k/ /a/ /t/ is a typical phoneme segmentation task.

Unit 6: Phonics and Word Recognition
