Understanding the Suffixes "-able" and "-ible"

The suffixes "-able" and "-ible" are used to create adjectives from verbs or nouns, indicating that something is capable of being done or worthy of a particular quality. Both suffixes serve a similar grammatical function but have different spelling patterns and origins. Understanding these differences is crucial for correct spelling and vocabulary usage.

Definition and Usage of "-able"

The suffix "-able" is often added to complete verbs to form adjectives meaning "capable of" or "suitable for." It is more common in English and usually attaches to base words that are complete on their own. Examples include "readable" (capable of being read) and "manageable" (capable of being managed).

Definition and Usage of "-ible"

The suffix "-ible" also forms adjectives with a similar meaning but is typically used with

Latin root words that may not stand alone as complete words. Words such as "visible" (capable of being seen) and "audible" (capable of being heard) exemplify this suffix's usage. The rules for when to use "-ible" versus "-able" can be subtle, often requiring memorization and practice.
