Understanding Authors Point of View Worksheets

Authors point of view worksheets are instructional materials designed to help students recognize and analyze the perspective from which a story is narrated. These worksheets typically include exercises that prompt learners to identify whether a text is written in the first person, second person, or third person point of view and to explain how this perspective shapes the reader's understanding of the story. By focusing on the author's point of view, these resources cultivate analytical skills and support comprehension by encouraging students to consider the narrator's influence on tone, bias, and information presentation.

Purpose and Educational Goals

The primary purpose of authors point of view worksheets is to develop critical reading skills by guiding students to recognize narrative perspectives. This understanding enables learners to interpret texts more accurately and appreciate the author's intent. The worksheets often aim to:

Types of Point of View Covered in Worksheets

Authors point of view worksheets generally focus on the three main types of narrative perspectives: first person, second person, and third person. Each point of view offers a unique lens through which a story is told, affecting how information is presented and how readers engage with the text.

First Person Point of View

The first person point of view uses pronouns such as "I," "me," and "we," and the story is narrated by a character within the story. Worksheets addressing this perspective help students identify subjective narration and explore how personal experiences and emotions shape the narrative.

Second Person Point of View

Second person point of view employs the pronoun "you" and is less common in literature. It directly addresses the reader, making them a part of the story. Worksheets often include exercises that illustrate how this point of view creates intimacy or immediacy, enhancing reader engagement.

Third Person Point of View

Third person point of view uses pronouns like "he," "she," "they," and "it." This perspective can be limited, omniscient, or objective. Worksheets typically guide students to distinguish between these variations by analyzing the narrator's knowledge and involvement in the story.
